Welcome to this educational resource on hepatic encephalopathy

Download

Preview slide set

Welcome to New Insights into HE, an educational website developed for physicians and other healthcare providers with an interest in improving the identification and management of patients with hepatic encephalopathy (HE).

This website has eight core educational 'Modules' which were developed by the New Insights Steering Committee faculty. These modules review the pathogenesis of HE, the burden on patients and healthcare resources and appropriate diagnosis and management. There are also interactive, case-based activities, to help you consider how you will apply the information presented, and a summary of the must know literature in the field.

Please also access the 'Updates' tab for updates and highlights of the latest data which will ensure you remain informed and up to date about HE.

HE highlights from London 2014

All the HE highlights from Chicago USA 2014

Instructions for use of this website

- The on-demand core educational modules can be accessed in any order
- Please review faculty disclosures in the 'disclosures' tab
- The complete list of modules is available on the 'Modules' tab. This will indicate which modules you have successfully completed. On accessing the module please review the short pre-activity information
- After completion of each module, and successfully passing a short post-activity test and your evaluation you will be able to access your certificate of completion
- Updates and guest activities, as well as links to useful resources and a 'presentation to go' are available in the 'Updates' tab

The New Insights into HE Steering Committee

This programme has been developed under the direction of the New Insights into HE Steering Committee:

Professor Rajiv Jalan (Course Director)
Royal Free Hospital/UCL Medical School, London, UK
